Computer Resources Project

Project Objective
The main objective of this activity is to ensure you are aware of computing resources available to you. The Sun Ray thin clients give you a dual platform, providing both a Unix environment as well as Windows.

Project Overview
The project is an individual activity requiring each student complete two requirements:
1. Learn how to use a Sun Ray by logging into the system
2. Create a personal web page (if you already have a personal web page, edit the Pacific page to link to your page)

Problem Statement
During one of the following time periods, go to Khoury 207, the SOECS Sun Ray lab to:
1. Learn how to use the Sun Rays to access the Unix environment as well as the Windows environment.
2. During that time frame, create a personal web page and show it to the instructor. If you already have a personal web page, you can bring up that page instead.

PACS 1 Student Expectations Assignment
If you are currently in PACS 1 you have an assignment to post to the Written Communication Objective of your e-portfolio at least one formal essay. You must also post a self-reflection statement about this essay in response to the reflection prompt, which is stated on the Written Communication page. Make sure to include the essay topic either in your formal essay or your self-reflection statement.

Students must give access to their e-portfolio to their Student Advisor and to their PACS 1 professor. During this lab period you are encouraged to complete this PACS 1 assignment, sending an email to your student advisor, letting them know the work is posted and available. If you have questions about what is required for the PACS 1 assignment, ask your PACS 1 professor or your Student Advisor.

Project Evaluation (Each individual will be graded on meeting the two main project goals)
- Show up to Sun Ray help session, log into systems (50 points)
- Create your personal web page, or link to existing personal web page (50 points). At a minimum, the page should have your name and a link to something you find of interest.
- DUE DATE/TIME – must be checked off by Friday, 3:30pm (see schedule below)

Khoury 207 Lab Open Lab Sessions
